

## **VECON 4.6**

### **Release Notes**

(Linux and Windows Version)

(Released December 30, 2021)

*VECON version 4.6 has the following new features and improvements from version 4.5.1:*

#### **2D Modeling and Survey Design**

- Added the option to Extend a 2D Layer Model to 3D (under Utility Menu)
- Added the ability to Load Raypath to load in a .ray file that was generated previously

#### **3D Geophysical Model Building**

- Added the capability to Extract an Arbitrary 2D Line from a 3D grid model
- Improved the tool to convert an Ascii file to a Grid Model by allowing for transformation of coordinates and definition of rectangular cell size
- Added ability to Load / Remove 3D Ascii points in the plan view
- Added ability to Remove a previously-loaded 3D Layer, Model, or Object

#### **3D Modeling and Survey Design**

- Added ability to Load any set of 3D Ascii points to the viewer for display
- Added option to Export the Fold for the entire layer, including the bins with fold of zero

**\*\*Note:** Windows Users may need to exclude the installation folder from some antivirus software scans.
