

VECON 4.7

Release Notes

(Linux and Windows Version)

(Released September 9, 2022)

VECON version 4.7 has the following new features and improvements from version 4.6:

2D Modeling and Survey Design

- Fixed a bug so reading an input wavelet can be used when running 2D Finite Difference with or without Internal Regridding
- Fixed bug to correctly set Maximum Frequency when specifying an input wavelet

3D Modeling and Survey Design

- Added the ability to specify the type of rays to be used for the Directivity Correction in forward modeling of DAS response in 3D Finite Difference Forward Modeling.

****Note:** Windows Users may need to exclude the installation folder from some antivirus software scans.
