

## **VECON 4.8**

### **Release Notes**

(Linux and Windows Version)

(Released March 12, 2024)

*VECON version 4.8 has the following new features and improvements from version 4.7:*

#### **2D Modeling and Survey Design**

- Improved several functions related to building models from well logs
- Added option to create a model from the density log

#### **3D Geophysical Model Building**

- Added the option to Build a 3D Layer(s) from ZMap layer files (from Petrel)
- Added option to Well Log Editor to build a 2D model directly (in any orientation) following an existing 3D layer file or 3D grid model

#### **3D Modeling and Survey Design**

- Fixed the unit conversion of converting from Binary to Ascii file in “Convert Binary/ASCII utility
- Added the option to specify Depth vs Elevation when building project using User-Supplied Interfaces

**\*\*Note:** Windows Users may need to exclude the installation folder from some antivirus software scans.
